BAKING AND SERVING SUGGESTIONS

1. Preheat oven to 475 degrees.
2. Remove protective film wrap. Place pan on BOTTOM oven rack.(If bottom of pizza browns before top, move to top oven rack)
3. Bake 15 to 20 minutes at 475 degrees.
Check pizza at 10 minutes and rotate pan end for end.
(Pizza is done when cheese is bubbly and bottom crust is lightly browned.)
4. Remove pizza from oven. After brief cooling, slice pizza right in pan.

Tips

- If you refrigerate your pizza, remove from refrigerator 30 to 60 minutes before baking so it will warm to room temperature.
- If top browns before bottom, loosely lay a piece of aluminum foil over pizza and bake a few minutes longer.
- Best tasting if baked within 24 to 48 hours of purchase.
- If you freeze the pizza, let it thaw in the refrigerator. Then follow baking instructions.
